Stor & Go® Ethanol Fuel Treatment & Stabilizer
4-in-1 Formula
The ULTIMATE Protection & Performance
•Maximum Corrosion Protection
•Stabilize Fuel in Storage & in Use
•Cleans Entire Fuel System
•Restores Power & MPG
Ethanol-blended fuel can lead to excess water in the fuel system; water in the fuel system can lead to severe corrosion, engine damage and unanticipated shut-down.
Ethanol is naturally attracted to water and prone to separating from the gas and blending with any water molecules in the fuel system. This harmful "phase separation" of the fuel can lead to severe corrosion, decreased fuel economy and engine performance, rough starts and hesitation.

In addition, the cleaning properties of ethanol can loosen varnish and corrosion deposits which then travel through the fuel system.
STOR & GO helps prevent phase separation with the 4-in-1 formula that protects all gas-powered 2- and 4-cycle engines against corrosion, cleans the entire fuel system, stabilizes fuel for long-term storage and restores power and mileage potential.
Laboratory testing proves STOR & GO provides better water removal capability (per modified ASTM D 1401) and better corrosion protection (per ASTM D 665) than other leading ethanol fuel treatments.
1 oz treats 10 gallons for everyday protection. 1 oz treats 5 gallons for storage. Stabilizes fuel for 24+ months.

Salt Terminator® Engine Flush, Cleaner & Corrosion Inhibitor

Saltwater, salt air and road salt can lead to rust, corrosion, vehicle damage and costly repairs. Salt Terminator dissolves destructive salt debris that can't be removed by water alone and leaves a protective coating, guarding against future corrosion. Regular maintenance with Salt Terminator can help extend the life of vehicles, trailers, tools, gear and equipment.

Lab-tests show Salt Terminator excels at removing heavy salt deposits without leaving behind a spotty residue like other similar products.

Spray on Salt Terminator to clean and protect virtually any surface. Or, use the mixer unit with any of the concentrate formulas. It automatically dilutes the concentrate and siphons it through a standard garden hose. No scrubbing or rinsing required. Biodegradable

COVERCRAFT CUSTOM-FIT COVERS

Custom patterned for trailering

Sunbrella®

Sunbrella is made or true marine fabric-strong woven acrylic fabric that withstands extended outdoor exposure (Pacific Blue color)

GLEN-TUF™

Glen-Tuf is sturdy woven polyester that out-performs lightweight nylon & polyester type covers (Aqua Teal or Viking Blue color)

Ultra'tect™

Ultra'tect was developed from the need for a cover that would retain its color and strength during extended outdoor exposure, while providing a high degree of water resistance and UV protection at a reasonable price. Ultra'tect is made from solution-dyed WeatherMax® SL fabric. (Black or Blue or Grey)

Features:

- All stress seams are overlapped and double stitched for superior strength.
- Strong, bar-tacked tie-down loops secure cover on watercraft for trailering.
- The underside of the cover has heavy-duty, double layer reinforcement panels in high abrasion areas.
- There are reinforced openings for trailer pins and security straps.
- An adjustable, heavy-duty, multi-strand shock cord is sewn around the entire hem.
- Reflexite® safety reflector strips are sewn on the back end of the cover to give additional warning notice when the watercraft is moored or on a trailer. (Reflexite meets both Federal and USCG specifications.)
- Behind the handlebars, along the top of the cover, there is a non-scratch, corrosion-free access zipper for vest and wet suit storage. There is also a sewn-in quick-dry mesh bag, with hook & loop closure, for storing gloves, goggles and other small items.
- Zippered gas cap access panel allows fueling while the watercraft is on a trailer.

CARBON FIBER ROTARY VALVES

These carbon fiber rotary valves won't destroy your motor if something goes through the intake like stock steel ones will!

Try a different opening (like 3–4°) for more power.

Modified engines need a bigger valve to let them breath!

(smaller opening — more bottom end)

(larger opening — more mid range and top end)

SOLAS FLYBOARD IMPELLERS | SEA-DOO

What is a FLYBOARD?
The Flyboard is the newest extreme sport! It is an accessory that attaches to a PWC which gives the Flyboard propulsion through air and water. The propulsion is routed through the primary nozzle that attaches to the feet of the Flyboard user.

How does the FLYBOARD work?
The PWC provides all of the propulsion for the Flyboard. The thrust from the PWC is routed through a long hose up to the Flyboard where a rider can control thrust to create any type of movement he/she desires. You can fly over the water, under the water, and have complete freedom to fly freestyle without the risk of getting hurt.

WSM BATTERIES

WSM Maintenance Free Battery
STX30L-BS
30 Ah 380 CCA
Part No. 004-407WSM

Once you have added the acid to these batteries, they become a completely sealed unit requiring a lot less maintenance than the Conventional Batteries. Although the battery still needs to be charged on a regular basis if your vehicle is not in use, there is no need to monitor the fluid level in this battery type. Unlike the conventional battery, once this type battery is sealed, it becomes spill proof, which can eliminate damage from battery acid that can occur from using a flooded battery.

PROTORQUE STARTERS | SEA-DOO

Part No. PH100-SD06

*** These applications were originally fitted with OEM Part# 278-000-577 (9 Tooth Starter) and were later superseded by Sea-Doo to OEM Part# 278-001-301 (8 Tooth Starter) for all replacements. Although the original starter for this application had 9 teeth and the replacement only has 8 teeth, the drive-end construction was modified on the 8 tooth version, allowing them to interchange without changing the flywheel.
